Art Unit: 2818

1. The following action is in response to the amendment filed by Applicant on April 3, 2001.

2. New claims 193-201 have been added.

3. Claims 151-201 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicant failed to provide an adequate written description of how the first operation code is sampled as claimed in claims 151-163, 173-192 and 197-201. It appears that only the clock signal and the input data are sampled.

It is not clear how the first operation code initiates an access of the programmable register as claimed in claims 164-172 and 193-196. It appears that the first operation code initiates the read operation.

4. Applicant's arguments with respect to claims 164 and 173 have been considered but are moot in view of the new ground(s) of rejection.
